GenAI Implementation Roadmap for Schools and Districts: The 4 Phases

AI for Education

1 Establish a Foundation

- Host an **introductory meeting and GenAI literacy training** for district and school leadership, board, and other key stakeholders
- Create a **cross-functional team** that includes leaders, teachers, students, and community members to workshop and develop **school or district-wide GenAI academic guidelines**
- Review your **organization's vision and strategy** for teaching and learning to identify opportunities for **high-impact generative AI integration**

2 Develop Your Staff

- Provide **professional development on GenAI Literacy** covering how the technology works, its capabilities and limitations, and how teachers and students can **responsibly adopt the tools**
- **Share the GenAI guidelines draft for feedback** and work with teachers on applying them in their practice
- Collaborate among leaders and teachers to **vet the safety and efficacy** of available GenAI tools; **determine which tools to pilot** that are aligned with your organization's vision and strategy

3 Educate Students & the Community

- **Build common understanding** by sharing your **GenAI guidelines and how they support your organizational vision** with caregivers and community members via newsletters, town halls, etc.
- Support teachers in **updating their syllabi to include the GenAI guidelines** and create a plan to **introduce pilots of AI tools** where appropriate
- Launch student-facing GenAI Literacy training to **upskill students** so they are **future-ready**
- Provide **ongoing training focused on embedded, appropriate GenAI use** to teachers, students, and the larger school community

4 Assess and Progress

- **Establish metrics** and track the **impact of GenAI pilots** on student outcomes and other organizational priorities
- Create a cadence to **review and reevaluate your GenAI guidelines** in light of new advancements
- **Evaluate new GenAI tools for appropriateness** for teachers and the classroom to **launch additional pilot programs**
- Continuously update and provide GenAI training across the school community; include opportunities to **elevate best practices and/or voice concerns**
